

Paul Broman  
CS: 410 Text Information Systems  
Progress Report

Progress is being made at a good clip so far. Most of the technical and process hurdles are overcome and backend connections are in place.

**1) Which tasks have been completed?**

Here are the tasks that have been completed so far:

1. Determined
  - a. which elements questions are suitable for LLMs and
  - b. which are more suitable for traditional programming.
2. Coded basic internal facing front end
3. Created a client facing form for user information input
4. Used Python and API services to create form template and fill in basic paperwork fields

**2) Which tasks are pending?**

Here is what is pending:

5. Engineer prompts and API calls to turn user information to answer paperwork questions in a legal voice.
6. Q/A system with lawyer Connect to mail sending APIs in order to have the paperwork sent automatically Deploy with real life test user (Already sourced)

**3) Are you facing any challenges?**

SO FAR, no challenges. As I begin to interact directly with the LLM may have more problems. Also, QAing also reveals bugs and edge cases that can take a long time to resolve.
